SEPTONSIL

SEPTONSIL drops are an antibacterial medication developed for treatment of acute and chronic sore throat, tonsillitis and infections of the throat involving pus that make it difficult to swallow. This medication also helps reduce fever that may accompany these infections. As an analgesic, **SEPTONSIL** drops contain effective lymphatic medications to break up foci and ensure speedy drainage of accumulated toxins. In addition, this remedy stimulates leukocyte production and other defensive responses of the Mesenchyme and promotes more efficient excretion of toxic metabolic waste products.

Recommended use: 10 drops 4-6x/day, gargle and swallow
