AILGENO 50ML

AILGENO drops specifically stimulate and detoxify the spleen to eliminate focal infections and old deposits of toxins. This unique medication also helps treat anemia, gastritis, diabetes, eczema, herpes, chronic infections, chronic weakness and cachexia. It stimulates the entire metabolism.

Few homeopathic remedies address spleen dysfunction and intoxication, although this organ plays a vital role in the immune system response. In fact, some chronic diseases can be extremely difficult to heal unless the spleen is also treated.

In addition, when the body cannot excrete properly, it will encapsulate the burdening materials in local depots to protect itself against a massive intoxication. These foci can result in spleen insufficiency, which in turn leads to what appears to be completely different illnesses, such as diabetes. **AILGENO** drops reactivate and stimulate the spleen, which helps eliminate local foci while making systemic healing of chronic conditions possible.

Dr. Gaul's Recommended dosage: **Adults** 15-20 drops with meals
Children 5-10 drops with meals

Manufacture dose: 15-20 drops 3x/day directly or in liquid (water).
