COLLOIDAL MULTIMINS LIQUID (100ML)

Multi Mins Liquid (Colloidal) provides synergistic organic forms of trace and colloidal minerals in a great-tasting formula for maximum absorption and utilization, promoting overall health. Studies show that essential mineral reserves are depleted by stress, heavy metal toxicity, electromagnetic and environmental pollution, and poor diet, leading to chronic circulatory, musculoskeletal, immune and nervous system disorders. **Colloidal Multi Mins Liquid** is indicated for symptoms associated with hypertension, arteriosclerosis, osteoporosis, osteoarthritis, rheumatoid arthritis, and for slow growth in children, premenstrual syndrome, perimenopause and menopause. **Colloidal Multi Mins Liquid** is recommended for depression, schizophrenia, attention deficit disorder, heavy metal toxicity, and for those individuals who drink distilled or reverse osmosis water. Product ideal for vegans.

EACH TABLESPOON CONTAINS:

- Vitamin C (ascorbic acid). 30 mg
 - Calcium (calcium carbonate). 3 mg
 - Iron (iron gluconate). 0.3 mg
 - Iodine (kelp). 50 mcg
