

## ZELLULISAN CREAM 100G

### **Ingredients/ Therapeutic Profiles:**

- Arnica montana 3X microcirculation
- Ledum 3X uric deposits
- Rhus toxicodendron 6X stagnation of fluids
- Sulfur 15X connective tissue deposits
- Aesculus hippocastanum 1X venous blockages
- Betula alba 1X excretion, diuretic
- Hedera helix 1X rheumatic conditions, provides iodine
- Melilotus officinalis 1X venous stases

**Zelusisan Cream 100g** is for the detoxification of the connective tissue and relief of tendonitis. Weakness in the connective tissue, poor nutrition and a lack of exercise can cause toxic waste deposits to build up, particularly in the arms and legs. Although initially a cosmetic problem (cellulite), this condition is also a sign of lymphatic stagnation and blocked excretion processes.

Combining **ZELLULISAN** ointment with PEKANA excretion remedies, especially **ITIRES** drops or **MUNDIPUR** drops, corrects this build up and allows proper excretion of toxins.

In addition, this ointment is highly effective in treating acute and chronic tendonitis.

**Recommended dose:** apply a moderate amount of ointment 2 times per day by rubbing gently into the skin. For external use only.
