

HMF NATOGEN (6 G)

HMF Natogen Probiotic Formula provides a highly-concentrated, ratio-specific combination of ***Lactobacillus acidophilus***, ***Lactobacillus paracasei*** and ***Bifidobacterium animalis subsp. lactis***, essential to the development and maturation of the newborn's immune system.

Studies show that microflora imbalances in the newborn can increase the risk of childhood allergy and susceptibility to infectious disease, leading to diminished immunological protection, nutritional malabsorption and decreased capacity to detoxify harmful compounds in later years.

The ***Lactobacillus acidophilus*** in the **HMF Natogen** will target and stimulate the mucosal immune system and will colonize the upper gastrointestinal tract.

Bifidobacterium animalis subsp. lactis is crucial in the newborn infant and helps stimulate the immune system and colonize the lower gastrointestinal tract. **HMF Natogen** is recommended for all newborns in order to properly develop the immune system and, thereby, assist with the prevention of allergies and infectious disease. This product is ideal for vegetarians.

RECOMMENDED DOSAGE

Children (1-4 years): Take one scoop of HMF Natogen daily with a meal, or as recommended by your health care practitioner.

Risk Information: If you are experiencing nausea, fever, vomiting, bloody diarrhoea or severe abdominal pain; or if you have an immune-compromised condition, do not use. If symptoms of digestive upset occur, worsen or persist beyond three days, discontinue use and consult your health care practitioner. This product has come into contact with milk. Do not use this product if you have a milk allergy.

EACH SCOOP (100 mg) CONTAINS

Probiotic Consortium. 3 billion CFU

- Lactobacillus acidophilus*** (CUL-60)
- Lactobacillus acidophilus*** (CUL-21)
- Lactobacillus paracasei*** (CUL-08)
- Bifidobacterium animalis subsp. lactis*** (CUL-62)
(formerly ***Bifidobacterium infantis***)
