

SPECI-CHOL

SPECI-CHOL drops are indicated for treatment of functional disturbances of the pancreas, including reduced secretion of digestive enzymes and insufficient production of the hormones insulin and glucagon.

To resolve pancreatic conditions and eliminate symptoms of insufficiency, it also is vital to treat the liver, gallbladder and stomach with a comprehensive therapy since a close functional link exists between these organs.

Recommended dose: 15drops 2x/day

Manufacture dose: 15-20 drops 3x/day

Ingredients/Therapeutic Profiles:

Chionanthus virginica 3X liver and pancreatic disturbances

Eichhornia crassipes 2X improves pancreatic secretion
