

## PRIME CHLORELLA

Chlorella is a single-celled freshwater algae. It reportedly contains a very high amount of chlorophyll and is a rich source of vitamins and minerals. Chlorella is the world's most researched food product and is the finest, broad spectrum dietary supplement available today.

Our **Prime Chlorella™** is of the highest quality, pure and cultured in sunshine. It is cultured in filtered clean mineral water and processed especially for highest digestion. It is tested regularly in Canada as mercury free.

**Recommended dose:** 15-20 tablets before lunch
