MUSCULO-SKELETAL

OSTEODORON PM BONE SUPPORT POWDER (60ML)

Osteodoron Bone Support Powders are not an ordinary calcium supplement; they stimulate assimilation and metabolism of calcium, leading to healthy bone and teeth formation and development. Use the two natural powders simultaneously as follows:

- **Osteodoron AM** in the morning
- **Osteodoron PM** in the evening.

(Age 12 and older: 1/8 teaspoonful; Ages 2-11: 1/16 teaspoon; Under age 2: Ask a doctor.)

For healthy bone development, pregnant women should use **Osteodoron**, under a doctor's care, from the fourth month through pregnancy and during breast-feeding until the child is 4 months old. Ask your doctor about giving at least one 6-week course of powders to the 4-month-old child, more if indicated (e.g., if the child is not assimilating nourishment).

Ingredients:

lactose, oyster shell, oak bark, fluorite, quartz.

Non-Medicinal Ingredients:
