

TOXEX

TOXEX drops are indispensable for excretion of all endogenic and exogenic toxins that can lead to development of acute and chronic illnesses. Regular use of **TOXEX** drops helps eliminate toxins produced by alcohol, allopathic drugs, septic conditions of the blood, foci, metabolic waste products and heavy metals such as cadmium, lead and mercury found in amalgam fillings.

In addition, **TOXEX** drops have antibacterial properties that make this remedy ideal for treatment of acute infections of the organs and mucous membranes, including bronchitis, angina and tonsillitis. It also stimulates the mucous membranes, the lymphatic system and metabolism, and is useful in treating precancerous conditions. This medication also is effective for treating patients with chronic bacterial infections because it aids the excretion of toxins that have been deposited over the years in the connective tissues. Please Note: To help with detoxification, chronically ill patients must drink plenty of fluids and take vitamins and trace elements, including magnesium, zinc and selenium.

Ingredients/Therapeutic Profiles:

Argentum nitricum 4X antibacterial, nervousness

Bryonia alba 4X chronic infections
