

## PRODUCT INFORMATION

### Metabolic Typing

## GREEN TEA EXTRACT 60VCAP

#### Ingredients:

Green Tea (decaffeinated) 550mg

Providing EGCG 275mg

**Green Tea EGCG 95% polyphenol concentrate** is used for Metabolic Typing Cancer treatment. It is an excellent primary cancer remedy, operating at many functional sites and molecular targets in cancer therapy. EGCG stops cancer in many different ways.

The compounds of green tea prevent cancer by inhibiting DNA methyltransferases. Using an encapsulated preparation is superior to intake of green tea – you would need too many cups of green tea to be practical.

Green Tea is absorbed best when taken with something that has black pepper in it or with a small amount of a food that has tartaric acid. For example: grapes, wine, banana or tamarind.

**Please note: Always take an extra 400IU daily of Vitamin E**

**Recommended Dose:** 1 capsule 1-2x daily or as directed by a health care practitioner.
