apo-OEDEM drops are effective for treatment of different forms of edema (or swelling), including cardiac, hepatic, renal, lymphatic and subcutaneous cell tissue. Conditions that can trigger or accompany the development of edemas include inflammation, deposits, disruptions in circulation and circulatory weakness through coronary insufficiency and reduction in kidney function.

apo-OEDEM drops also help relieve swollen ankles due to water retention, abdominal bloating and venous stasis.

Recommended dose: for chronic edema, 15 drops 2-3x/day

For acute edema, 15 drops up to 6x/day

Manufactures dose: 15-20 drops 3x/day
