

Metabolic Typing

CURCUMIN COMPLEX 180VCAP

Curcumin Complex is used for Metabolic Typing Cancer Care treatment.

Blocks inflammatory cytokines especially prevalent in anaerobic metabolism. Major repressor of inflammation. Curcumin is used with bromelain for absorption.

As an anticancer agent, it is a chemo preventive, affects cell cycle progression and transformation, causes apoptosis of malignant cells by more than one mechanism, prevents angiogenesis and metastasis, and is effective even against drug resistant cancers. Curcumin has been shown to be effective against all forms of human cancers without any serious side effects.

Actions:

- Antioxidant
- Anti-inflammatory
- Chemopreventive (cancer-preventive)
- Antineoplastic (cancer-fighting)
- Immunodulator
- Neuroprotector
