

## CORO-CALM (50 ML)

**Coro-CALM** drops are a cardiac sedative for treatment of tachycardia (high heart rate) and disrupted circulatory functions, as well as anxiety, fear, worry and psychic unrest that frequently accompany these conditions. This medication is intended for cardiac preinsufficiency, spastic cardialgia with radiation, nervous and agitated state of the heart, pulse anomalies, arrhythmia, extrasystole and cardiac neurosis. In addition, it regulates blood pressure, improves oxygen utilization and helps heal focal damage in the heart muscle. **coro-CALM** drops also improve breathing to help eliminate fear and nausea that may accompany circulatory anomalies, and assist gastroenterocardial regulation processes necessary to eliminate heart neurosis.

**Recommended dose:** 15 drops 2x/day
