

## GLUCOREKT 50ML

**GLUCOREKT** drops regulate sugar metabolism while helping resolve metabolic disturbances that lead to diabetes.

The metabolic condition of a patient suffering from diabetes requires both therapeutic and nutritional measures to correct the illness. Along with the patient's strict compliance to a proper diet, therapy must stimulate the body's self-healing powers to prevent arteriosclerotic or even gangrenous developments. Because the illness frequently first appears as adult-onset diabetes, it is also necessary to address initial degenerative developments in the eyes (glaucoma), chronic lymphatic weaknesses, hypertonia, hardening of the liver and rheumatic processes.

### ***Ingredients/Therapeutic Profiles:***

Acidum sarcolacticum 6X diabetes, muscle weakness

Acidum sulfuricum 4X diabetes, intestinal dysfunction

Allium cepa 4X flatulence, colics, regulates digestive processes

Chionanthus virginica 3X dysfermentation, liver and pancreatic function

Phosphorus 10X regulates metabolic processes

Zincum sulfuricum 3X insulin secretion

Stigmata maydis 1X regulates blood sugar levels, sclerotic changes

Syzygium jambolanum 1X diabetic ulcers, weakness
