Cardiovascular

HAWTHORNE SOLID EXTRACT 224G

This solid extract is a 30:1 concentrated extract of Hawthorne berries, 30X stronger than the strongest tincture available. Hawthorne is an excellent nutritional support for the heart and cardiovascular system.

Medical studies have documented that Hawthorn berry extract is a safe alternative to traditional heart and blood pressure medications, providing antioxidant and super food ingredients that are similar to those found in wine grapes. We use hawthorn extract to naturally treat heart palpitations, high blood pressure, shortness of breath, and hearts weakened by damage from heart attacks and atherosclerosis.

Solid extract is a sweet, syrupy substance that is an easy medicine to take as a tonic.

Recommended dose: 1 teaspoon/day

Manufactures does: 1/8 teaspoon 1-3x/day

Ingredients:

Crataegus monogyna (Hawthorn) solid extract (4:1)100mg
